Hey-Hey!!!,I seem to remember that the KT77 had a 30W plate like a 6L6-GC instead of the 25W of the EL34 pentode. Otherwise quite intrchangeable, and it seems that the old American 6CA7 beamer had a 30W plate. Certainly the new EH beamer has higher plate diss than an EL34. From a few folks, the new KT77 seems like a good deal. If there weren't a lot of more interesting stuff to play with, I'd still be building EL34 amps.cheers,Douglas
