Where do you guys go for information about audio equipment test results? I don't mean reviews. I can get those anywhere, and I don't usually trust them because they're full of shills. I'm looking for honest to goodness testing that is unbiased. My go-to source used to be Consumer Reports magazine, but they've really gone downhill these past few years. The magazine reads like a BuzzFeed post right now, rather than a well-regarded consumer protection journal. So, where do you turn to find out whether a battery powered speaker really lasts all day, or whether a TV really does have the clearest picture and is easy to install?
