Just a matter of time ..... The nay sayers were wrong. Not that it mattered to me with 6 turntables and many LPs. The cost though is bad..but the days when I could get a new LP for under $3 are long past and if you go by inflation $25-30 is probably not out of line. Thinking back I was only getting paid about 5K a year...now my retirement is more than that per month. :roll:
