Wayne Parham wrote on Tue, 24 October 2023 21:42 Not sure about the roof either - hopefully it doesn't vibrate and buzz. Oh, it will. I speak from experience.

If you have floor speakers, try propping them up on cinder blocks. I think the air gap is what makes the difference, rather than leaving the speakers on the concrete floor. If that doesn't help, try throwing a rubber mat underneath the speakers, like what you'd use as a mouse pad.
