Thank you Wayne.
I have some questions regarding the components for the 3Pi.
When buying the crossover for the 3Pi is there an option to specify what drivers it will be used with?
In my case Delta-12LFA(that I can source locally) and the DE250(that I already have)
I saw on the crossover notes that there are different components involved for different drivers
Is the 100W 8 Ohms zobel to be purchased separately ? .
Kind regards,
Massimo
