COMAC. Just one of China's industries in the process of surpassing American and European aircraft engineering and manufacture. Things are surging exponentially with our claimed competition with the Peoples Republic of China. Surging all with the Chinese. One look at current news with Boeing shows a company, once a world leader in designing and manufacturing quality reliable aircraft. To a company reeking in internal controversy of management and it's effect on the product that reflects bad management.

A company with a culture of neoliberal corporate entitlement that now is facing the chickens coming home to roost. Which is what our country is facing more and more internationally. Thanks to China. Our legislators in the pockets of our Oligarchy have acquiesced the ideology of the free market as the arbiter of a way to run our economy and influence our government. Make it small and dependent on corporate and wealthy finance. Let corporations grow into monopolies and corner the market. Repeal and reduce regulation so that a company like Boeing can fulfill its own quality control. Allowing a couple of their early 737 Max planes to plow into the ground killing multiple hundreds of lives. And allow shallow uncritical media to fill peoples heads with corporatized news that puts the old Orwellian spin on the way things are said to be.

Mr. Walmsley describes the details.
