I wrote a note that describes a way to repair the column-shift transmission gear indicator in a 1968 Impala. And since I don't participate on any automobile forums, I wanted put it here but this isn't really the best place for it. So I put it on another forum I run, called "Bella Vista Babelfish."

This other forum probably really isn't the best place for it either 'cause it's mostly just a place I use to test before doing code updates or migrations of AudioRoundTable.com. I also let my kids use it as a sort of a blog over the years. So it's a scratchpad, so to speak. But maybe I'll start putting more stuff on there, I dunno.

I just know that posting this repair tip will let the information get gobbled up on the search engines where it might be useful for someone.
