A key component of how this God awful mess got traction and put into motion is admitted to by Victoria Nuland. Now a retired diplomat to Ukraine. This whole thing could have and should have been averted but for our insufferable, idiotic, stupid, arrogant foreign policy. What the pundits in the know are saying is this will play out until after the November US election. So, let even more lives be wasted in this obscene cause perpetrated by the western NATO alliance. Sick! Just as our Israeli policy is.
