I thought I knew everything there is to know about The Stones as a band. I did not, in fact, know everything. A large part of what we will be hearing in upcoming episodes is based on previously unheard audio clips of "interviews" with the band members. This happened during their Exile On Main Street tour, and from a book titled STP by Robert Greenfield. There is only the introduction episode and two regular episodes on air right now. Each new episode drops every Wednesday and you can find it on any platform you use to listen to podcasts. I use PodBeam.

Fascinating stuff. I give it a 10 out of 10 so far.

Sounds like an awesome find! I've heard about Stones Touring Party (STP), but I didn't realize they had such unique content, especially with those unheard interview clips from the Exile On Main Street tour. That's a legendary era for The Stones, and getting an inside look through Robert Greenfield's book and this podcast sounds like a must-listen.
