...and here we are at "some day!" :d

I am going to be optimistic that this marriage between McIntosh and Bose is a good thing. I mean, nobody wants to buy something just to kill it.

Except Walmart. They killed Vudu. Well, they didn't kill it. Even worse. They abandoned it. They could have turned it into a service that was as big as Netflix, but they didn't. They just let it rot, and then sold it to Fandango at a loss. Oh, whoops, I meant an "undisclosed amount." I can't understand Walmart sometimes.

But I digress. Silly me. :roll:
