Subject: 3 Pi build Posted by Soulman on Sat, 04 Jan 2025 19:56:19 GMT View Forum Message <> Reply to Message

I've decided to build a set of 3 Pi speakers using the B&C DE250 and 12PLB100 drivers.

I have a few questions.....

- 1. Birch ply or MDF?
- 2. Baffle mounted on the front or inset to the frame (sides, top and bottom)?

There's going to be more as I get into the build but I want to plan the cabinet first.
