Yesterday Secretary of State Anthony Blinken gave a farewell hurrah press conference that was interrupted by two dissenting journalists to the policy of America's involvement with Israel and the cruel handling of Gaza. The world court determining it as genocide.

These two journalist's were uniformly not supported by their peers for their dissent towards Secretary Blinken and our policies permitting genocide. One was forcefully carried out of the proceedings, the other complied to leave.

This article speaks well of the hypocrisy of the totality of our foreign policy and to the hypocrisy of our journalistic integrity.

This article today from the blog Moon of Alabama shows the complicity of journalism with our national foreign policy narrative that shapes public sentiment.
