There are plenty of good capacitor brands to choose from. I prefer poly film caps, and there are good ones from various manufacturers. We stock Erse, Solen and Jantzen as well as Auricaps, and I really like each of those.

There aren't as many brands for 10 watt resistors, but we stock both Xircom and Mills and I like 'em both.

The hundred watter used in the Zobel is available from Ohmite and Uxcell. We stock the Uxcell part, which is a good quality resistor and easy to mount. The Ohmite resistor is excellent as well.
