This series doesn't fit your criteria, but it does make a tangential glancing blow: Loudermilk

It's a story about Sam Loudermilk, who is - or was - a music critic that developed a chemical dependency problem and is now sober and acting as a group counselor. So there are lots of music references, mostly of 90s music but many from the 60s onward.

And other than that, the series is just plain wrong. I'm not sure why I like it, but I do. It's just so wrong.
