Pilot Radio

These guys make an incredible phono preamp. What makes it really cool, is that it's a vintage design made with modern parts. Best of both worlds. And it looks sooooo groovy!

Even more, the current company owners actually have family ties to the original Pilot Electric Manufacturing Company. Pilot Electric was founded over 100 years ago in 1919, and made amplifiers and radio receivers through the years. The current owners - Robert and Barak Epstein - are the grandson and great-grandson, respectively, of the founder of Pilot.
