The following link is from Psychology Today, and answers the question quite nicely. It's 2 1/2 years old but it aged well. It didn't go into the science of music and the science of the brain, but it's still very informative.

<http://https://www.psychologytoday.com/us/blog/science-of-choice/202211/how-listening-to-music-affects-your-mood>
