I was going through my spare speaker building supplies, and found the drivers for 1 PI speakers. I even have some 5/8" Baltic birch plywood. What I can't find is a 2 1/2" cardboard tube.

Every supplier wants to sell me 25+ tubes. I have some 2 1/2" schedule 40 pvc pipe. How much do I have to modify vent length, and box size.

Thanks for your help in advance.
