And now the elite enablers of this horror show have come to the conclusion to shore up their image some. By saying well yes there is rather a bit of evidence of Israel actually "starving" the entire population of Palestinians in Gaza.

The Israeli ministry of death proposed that from the get go! But being craven spineless political hacks they seem to get the message now. So the, "Israel has a right to defend itself" mantra is being shelved somewhat to perk up their standings with world condemnation of this sick and demented regime called Israel. Don't forget folks, "Our landed aircraft carrier" of the Middle East. "If there wasn't an Israel, we'd have to create one" old dementia Joe said.

America First is our feted fraud of an Empire. These politicians are spritzing perfume over the stink they created long ago and still continue by trying to acknowledging the obvious. History will show them if the authors of it are truthful, as being as accomplices to mass murder. You can't pretty that up.
