Two American officials, Witcoff & Huckabee are to inspect the distribution of food sites in Gaza that will undoubtedly be a "Dog & Pony Show", contrived by Israeli officials to be an orderly process based on humanitarian concerns. All a farce. The sites themselves are run by a shell company of Two Oceans Trust called UG Solutions run by a lunatic ex green beret Jameson Govoni running the distribution security with former US soldiers.

One of them is speaking out now towards the conditions there and as a witness to the atrocities being carried out by the IDF and by some of the contractors of the distribution outfit. Here being interviewed by Tucker Carlson.

What all this shows is how the United States mismanages and creates most the chaos in this world. With Israel now finalizing its genocidal atrocity in Gaza with starvation as a tool to rid a whole society once and for all from their midst. With the help of American weapons of destruction. And even this degenerate method of making a buck for some investment group to contract food aid. This should be a United Nations run entity without any financialized kickback.

Its a sickness that runs deep in our government.
