Becky wrote on Fri, 17 October 2025 02:43 For me, FM and AM are the only stations that I've listened for music and little talks. The more I tune on my radio, get the station I wanted for the moment. Mostly, it's always news and songs that I do much like.

My focus is on listening to a lot of FM stations because I am the type who enjoys playing music all day. I won't even mind having the radio on from morning till night as long as they play quality songs. My favourite station right now is Magic Radio because they play some contemporary songs from old great artists.
