Yurimi wrote on Tue, 26 July 2016 06:11That sounds like a helpful tool. Wireless connection is often troublesome; sometimes because of small errors that we can't tell exactly. I didn't expect we can have such technology in this age!

Technology is coming up with lots of tools that we can use for most of the things that we need in terms of audio setup, sound control, and others. I have experienced firsthand how we can get things right with the help of technology, and it has been a lovely experience.
