Madison wrote on Mon, 17 July 2023 20:10Have you considered changing Alexa's voice to one from a different country? I have mine set to Australia and I haven't been getting ads. I believe it's the only viable workaround at the moment.

This hack has worked for a couple of smart TVs, but it always looks like it is difficult to do so on the new models that these brands make nowadays. I am saying so because I have a friend who deals on electronics, and we just had this discussion about how difficult it is to get those TVs that don't have ads on every click.
