Lizah wrote on Fri, 19 February 2016 06:29: It can definitely be done, but it will take some research to find out how to do it. You also have to decide what to enclose them in to make sure that the sound doesn't leak out.

There is a whole lot of information on this forum that can be of great help towards building such speakers. All it takes is relaxing and finding out which one works better and if one's budget can be able to cover it if they decide to go the diy route.
