Becky wrote on Thu, 16 October 2025 05:48I can't remember that last time I listened to the radio for updates or weather forecast. Many things have changed with us and listening to radio is one of those. That popularity has died down because technology have made lots of them easy. I still do from time to time. Most times, I stream those radio stations online because I can't get clear signals each time that I am home.
