I used to buy stuff from the McGee catalog. It was always mail-order for me.

You know what's weird to me, is how my mind blends the last 50 years into a short span of time. Doesn't seem long ago at all. It has all been a brief evolution of stuff in my mind.

But then I can also remember back when I was a kid, waiting for a month or two for something was an absolute eternity!

Perception of time is really funny!
