Malfoy wrote on Tue, 07 August 2018 23:05 Television makers seem to try to imitate the experience we have in the theaters. This could be the reason for all the added innovation done on TV. 3D, curvature, bigger size, and whatnots were all taken from the theaters.

We now have more versions of smart TVs, which I can say is proof that TV manufacturers are working hard to ensure that many of us get that cinematic experience right in the comfort of our homes. If you ask me, I will say that it is a welcome development.
