gofar99 wrote on Tue, 30 June 2026 20:46Hi, I understand heat...it what AC is for as it is usually pretty warm in Arizona anyhow. I have presently a quad of KT120 mono blocks powering my system. Yes they do get warm. The photo is from a while back but I think you will get the idea. Air-conditioners certainly fix that worry about hot temperature in the room. It's such a cool idea. How much did you spend when you purchased the mono blocks?
