A smorgasbord of the big picture in our world. What's going on and why. The United States has dominated the world geopolitical scene acutely since the end of WWII. When the world was recuperating from the big war. This new century has seen that dominance waning. And now its taken on a sense of desperation to hold on to that dominance from the U.S.. These two articles put into perspective what is playing out now in our world. The good, the bad and the ugly. Most of which I have to say of the latter part of that phrase is what the U.S. is doing in the world. Unfortunately.
