The race is on. To the bottom. A recent multinational poll called the Democracy Perception Index. Giving the standings of countries in the world based on the perception of their behavior in the world.

The number one ranking at the bottom goes to. Drum roll please... Israel. No surprise there. Their treatment and most egregious genocidal tendencies with the people of the once "Palestine" that was wrenched away by the western nations of the United States and Great Britain after WWII. Has over their history of nationhood from 1948 on have, just like what the Europeans settling the US did with the American Indians. From apartheid to genocide.

But not far behind is our own nation, 64 out of the 68 nations listed on a perceived lack of democratic principles. Draw your own conclusions why.
