I am new to here and have a simple question about a pi speaker kit. Does every kit include a pair of speaker components? So what I need to do is constructing a pair of cabinets for the kit? Thanks, Jae

OK, I got it. It includes only a single speaker.

copy of the plans. For larger speakers that incorporate a compression tweeter and crossover network, kits also include the crossover, tweeter compensation cable assembly, Zobel woofer damper, and all cable assemblies are completed and ready to install. Every kit containing a compression driver also includes the horn flare and the bolts to mount the driver to the horn.
