I noticed that the Audiophile series is no longer showing up under kits section.  Was looking specifically at the 7pi. Has it been withdrawn?

That's right, they are no longer available.  Eminence dropped the Magnum line and I do not have time to test other options in the near future, so for the meantime, the Audiophile Series is no longer available.

Thanks Wayne.  Does that mean the B&C drivers did not work out?

I'm sure the B&C drivers are fine, but I haven't had time to test and optimize the crossover for them.
