Subject: How do I brace these speakers.

I have some Cerwin Vega VS-120 cabinet speakers (Bass Reflex). Though I now these are Mid-fi speakers and I would love to replace, The box just booms out the bass. My favorite Preamp has no tone controls as a result of coarse, I can't attenuate lower frequencies. Do I use 1 x 2 inch boards or should I use a baffle of sorts where there would be more contact with the respective sides?I know I can enjoy a high level of knowledge from members on this board.Thanks again,Brad

Well I recieved your plans Wayne for the Corner horns. Man these are large. I am going to have to reevaluate putting these up on the wall.Big living room. . . Ok. Mine? hummmmm. Well looking over the info, I noticed your clear instructions as it relates to bracing. . . I'm good. Good stuff here wayne.
