Wayne, I've mentioned that I'm considering adding the 7 Pi midhorn to my Theater 4's, and talked about moving the high-frequency horn to the top of the stack. Is moving the high-frequency horn necessary? Would it work ok to place the midhorn on top of the 4 Pi cabinet and leave the high-frequency horn mounted in the bass cabinet (between the woofer and the midhorn)?Jim Dombrowski

corner and it will sound the same. If that's not possible, near the corner or at least back against a wall is the next best thing.
