Hi,I am currently using the Eminence Beta 12 LTA in 5 cu ft reflex cabinets (similar to Hammer Dynamics) I am considering making the Two Towers with the Alpha 10". Given that both cabinets are of a similar size and type, which is going to give the better lower octaves?Or ... would one of the Theatre Three be a beter overall choice?It would be used with 300B SE amp.Any thoughts or opinions would be appreciated!Thanks in advance,JD.
