A friend gave me a pair of JBL 2407.  Can I use these for a 2 ways setup and if so what is optimum crossover points for them in a home setup.  Thanks for any pointer.

Yes, you can use them similarly to other 1" exit compression drivers.  This driver is actually a ring radiator made to drive a horn.  You'll need an adapter to mount the standard 2/3 bolt pattern, JBL part number 339308-001.  Crossover above 1.2kHz.

I plan to cross them at 1600hz.  Can I use Pi 1600hz crossover diagram (starting out with the C2, L1, etc...)  for the 2407.  Thanks for your help Wayne.
