Hi,Can anyone direct me to a good set of Studio Two construction photos? Searching the archive brings up a few links but they're mostly dead. Trying to figure out if I can build these or if I have to hire someone.Thanks in advance,Peter

Don't know how that double post happened.Just wanted to add a few things:Screws or nails are a viable alternative to clamps, plywood is less messy and lighter than MDF, White or yellow carpenters glue is best, and not to obsess over methods and materials; some Pi is better than no Pi!
