Hi Wayne! I'm enjoying your superb Theater 4 day after day! Magic matching with SET 300B amps!!! had just a thought: could I add the midhorn from Theater7 to my speakers and use (modifying it a little) the actual Xover for midhigh drivers and bi-amp the system using a solid state amp for Delta15 in actual cabinets and 300B (JEL type) amps for PSD2002 and Alfa or Delta 10? Has it sense? could I improve this way the midrange tonal balance? Many thanks in advance! Vincenzo

Many thanks, Wayne! Could you send to me Theater 7 plans? As active Xover, could suggest to me some good and suitable DIY schematics? Grazie di tutto! Vincenzo
