down to just one version of each model, and the one listed is the one that used to be called the

also be used in this model.

Thanks for your reply Wayne.Due to budget constraint I'm thinking of using Eminence Delta15 and B&C DE250 for now and will be upgrading to Omega15 or JBL driver in the future. Which cabinet(Pi4 or Theater4) gives the flexibility of using all the three divers?

No cabinet supports a swap between a Delta 15 and an Omega 15 or JBL 2226. They're very different woofers. You can swap a JBL 2226 for an Omega 15, but not for a Delta 15.

Thanks again for you reply, Wanye.Is it possible to share both the Pi4 and Theater4 speakers plan?How about the crossover plan for the both the speakers?I'll be using B&C DE250 for HF.

Wayne, Totally unscientific, but I was able to downsize my oversized 4Pi boxes by lining the interior with styrofoam insulation. Seems tohave worked out OK. Light weight, plenty solid, reversable.Chris
