Hi everybody,I would like to know what is the frequency range of the "four pi" with the Eminence Omega 15" and the B&C DE250...Could you explain me the difference, sonically speaking, between the Eminence PSD2002 and the B&C DE250? Thanks in advance.Best regardsGiampiero - Italy

Response is 40Hz to 18kHz. The DE250 is a little smoother than the PSD2002.

Hi GianpieroI built PI IV last year and I'm really happy now. I used B&C DE250.If you live near Bologna and want to listen them, feel free to ask me.
