Subject: Question about 2 Pi Towers and Tweeter Options

I just received the plans for 2 Pi Towers (Thanks Wayne) and was looking at the ordering options. Is the Vifa Tweeter upgrade meant for old existing Pi one and two speakers, or is it an upgrade for both the old and the new?I guess what I'm asking is do I need to spend another $30 per speaker on the 2 pi kits to get the Vifa tweeter? If so, what are the current stock soft domes that come with the kit?Thanks,crazychile

The Vifa DX25 comes with the kits these days. I added the upgrade option so people with earlier

the Alpha 10 woofer and crossover included. No upgrade needed.

Thanks Wayne. One more stupid question.On the Xover plans you sent me it says use a 4.7uf cap. On the tweeter upgrade it says it comes with a 10uf cap. Which is right?Thanks,crazychile

The crossover should use a 10uF capacitor.
