I currently have delta 12lf in 3.5 cu. ft. ported box tuned to 40. Can I add the mid horn and ps2002 to this. Using a active xover between bass and mid and your xover between mid and high?

David,Check also the midhorn flat-pack kit, for a very reasonable price.(I don't work for Wayne. I am more like you, building and experimenting. Only that when you go out and ask for prices, and ask for wood cut in a CNC, they some times ask more than double just for the work with the computer or man/hour, +you have to pay the wood.)
