Hi Wayne,I am building the 18 Pi, but using corner-placed BR-cabinet for the Magnum 18HO.Did you modify in between the cornerspeaker crossover, like you did for the 4 PI? You send me the plans for my speakers in March 2006.If you have modified the crossover for the Cornerhorns, please send methe changes.Thank you and have a nice DayKarl

optimations will be there to find. It is pretty well optimized already.I am going through each of my designs with the Smith & Larson system, importing the Spice model and making measurements to

because the HF horn/drivers used are the same and the baffle spacing is approximately the same.

said, I don't expect to find much movement there.
