About an inch too big for the 4 pros but I wonder how they compare to the H-290s? The latter, BTW, are really beefy, more impressive than the Peavey CH-3 I used way back in my Theatre 4s. B&C ME-45

It's cool that the B&C horns are made of aluminum. I wish the ME10 were larger and had slightly smaller vertical angle because I'd definitely use it if it were. I like that flare.
