I'm getting kicked out of the only room in the house with usable corners so I guess it's time to find a new home for the pi 6's. I love these speakers, in fact they are unfinished because I set them up while I was still building, and liked them so much I couldn't bring myself to take them back out to the garage to finish them. The wife wants the room NOW! so if you are close to Tulsa and can get them quickly you'll get a great bargain.

Sounds like someone's gonna get a good deal. Your 6's sound like my 2's. Going on 3 years and still haven't finished the cabinets, even though I have all the stuff to do so.
