Boy do I love it when a great product, something I've always wanted, gets "improved", and the remaining stock cleared. First use today gluing the trim to the chassis boards of a Cornet and Clarinet from Hagerman. The pieces don't rotate at all and no need to stagger to get the mating surfaces flat. Incredible!! I posted a heads up on these a few weeks ago, hope some of you took advantage, 100 bucks for the quad at Woodcraft.

It is a good thing that the pussy cat did not get its tail in the clamp. Otherwise I could imagine the expression on its face would be entirely different. NW
