i got a paid of one pi used.box built by fredt in houston.previous owner said he replaced the "L1" then mentioned going to 1ohm from 2ohm to make the tweeter a little louder.i'm guessing it was resistor one, i'm thinking i'm gonna go back to 2ohm but i want to see the plans.thanks.Jeff

here is what the crossover looks like.looks like 6.2uf cap on tweeter, 1ohm resistor in line with tweeter and 16 ohm (shunt??) resistor on tweeter as well.only an inductor on the mid and not sure what exactly?http://farm4.static.flickr.com/3004/2935649925_1fc0c98b8b_b.jpg
