The only place I can really turn it up is in a pole shed in the middle of a Wisconsin winter. But it should do.. Wayne, can I get a copy of the 4&7 plans, I want to put my 15" omegas to work.

I was in and out of a lot of pole barns when I lived in Ohio and it's a scientific fact that it's 20 degrees colder inside than out. You using that silver quilted stuff they have the nerve to call insulation?

Only insulation out there will be a flannel coat.
