WHAT WOULD BE A GOOD PASSIVE CROSSOVER FOR THE three Pi SUBWOOFER ? I am using a 9 mh. now. Would it be better to go with a 12 db crossover? Thanks !!!

I use an active crossover with 90Hz 12dB/octave low-pass slope. Sometimes, it is good to go a little higher, sometimes a little lower. Don't high-pass the mains, let them blend. The further away the subs are, the lower the low-pass frequency for the subs should be. Sometimes it even helps to reverse polarity.
