Any interest in forming a group to donate unused CPU time to research? See link below for some of the more popular projects. I've been running SETI for several years, but the project is changing focus / platform in a week or so and I'm not going to continue. I think my donated resources can be put to better use (i.e., cancer, AIDS, weather research.)....Colin

I always dug that SETI parallel processing scheme. Loosely coupled, easy to implement. A very good parallel processing method for that type of problem.
