I see bushie boy has promoted one of the robber barons from Wall Street to push his tax and economic policies and try to con the rubes into thinking that the economy is in great shape. Right before the November Election season. They must really be running scared to tap that guy into this huckster job.' Step right Up! Miracle wonder pill." "Grows hair on a billiard ball!" " Cure's Gout!" I wonder what the Republicans had to promise him to give up his couple dozen million a year to shill for them.Thats like asking the fox to guard the henhouse. More tax cuts quick before the next election. Lets leave the mess to the Democrat that inherits the White House; the mess in Iraq/the mess in the economy/ the mess in New Orleans/ the mess of the immigration invasion/ the mess of the debt. Boy are we screwed." Ah Yesss; never give a sucker an even break; or smarten up a chump." William Claude Fields
